PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

AUTHOR INDEX
VOLUMES 1–10
1950–1959

VOLUME 11, NUMBER 3, PART 2
(Whole number 68)
JUNE, 1960

PUBLISHED BY THE SOCIETY
MENASHA, WISCONSIN AND PROVIDENCE, RHODE ISLAND

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, Curtis Reed Plaza, Menasha, Wis., or 190 Hope Street, Providence 6, R. I.

Second-class postage paid at Menasha, Wisconsin. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 35.40, paragraph d., P. L. & R.

EDITORIAL STAFF
1950–1959

EDITORS

G. A. Hedlund, 1950–1954
Nathan Jacobson, 1950–1953
A. C. Schaeffer, 1950–1955
G. P. Hochschild, 1951–1952
Richard Brauer, 1954–1956
Shizuo Kakutani, 1955–1957
R. P. Boas, 1956–1959
S. S. Chern, 1956
Irving Kaplansky, 1957–1959
Hans Samelson, 1957–1959
P. R. Halmos, 1958–1959

ASSOCIATE EDITORS

C. B. Allendoerfer, 1950–1952
R. H. Bing, 1950–1951
A. H. Clifford, 1950
M. M. Day, 1950
J. B. Diaz, 1950–1952
F. G. Dressel, 1950
G. P. Hochschild, 1950
I. M. Sheffer, 1950–1951
Max Shiffman, 1950–1952
G. W. Whitehead, 1950
P. T. Bateman, 1951–1953
N. J. Fine, 1951–1953
A. W. Goodman, 1951–1953
E. H. Spanier, 1951–1953
Bjarni Jónsson, 1952–1954
A. E. Taylor, 1952–1954
R. C. Buck, 1953–1955
E. A. Coddington, 1953–1955
E. R. Kolchin, 1953–1955
E. E. Moise, 1953–1955
Bernard Friedman, 1954–1956
W. H. Gottschalk, 1954–1956
Marshall Hall, Jr., 1954–1956
J. A. Jenkins, 1954–1956
R. H. Bruck, 1955–1957
Walter Rudin, 1955–1957
Raoul Bott, 1956–1958
Paul Civin, 1956–1958
Edwin Hewitt, 1956–1958
R. M. Thrall, 1956–1958
R. V. Kadison, 1957–1959
Jacob Korevaar, 1957–1959
I. M. Singer, 1957–1959
John Wermer, 1957–1959
Erwin Kleinfeld, 1958–1959
M. O. Reade, 1958–1959
Richard Bellman, 1959
Felix Browder, 1959
I. N. Herstein, 1959
J. C. Moore, 1959

INDEX OF VOLUMES 1–10
1950–1959

Throughout this Index, bold face numerals are used to denote the volume number; light face numerals denote pages.

Abhyankar, Shreeram. *Two notes on formal power series*, **7**, 903.

—— *On the compositum of algebraically closed subfields*, **7**, 905.

Addison, A. W. *A note on the compositeness of numbers*, **8**, 151.

Addison, J. W. and Kleene, S. C. *A note on function quantification*, **8**, 1002.

Adelman, D. M. *Note on the arithmetic of bilinear transformations*, **1**, 443.

Adney, J. E. *On the power of a prime dividing the order of a group of automorphisms*, **8**, 627.

Agarwal, R. P. *Some transformations of well-poised basic hypergeometric series of the type* ${}_8\phi_7$, **4**, 678.

Agmon, Shmuel and Bers, Lipman. *The expansion theorem for pseudo-analytic functions*, **3**, 757.

Agnew, R. P. *Mean values and Frullani integrals*, **2**, 237.

—— *Equivalence of methods for evaluation of sequences*, **3**, 550.

—— *Permutations preserving convergence of series*, **6**, 563.

Aissen, Michael. *A class of super-additive functions*, **4**, 360.

Akutowicz, E. J. *On the determination of the phase of a Fourier integral*, II, **8**, 234.

Alavi, Y. and Wells, C. P. *Expansions of parabolic wave functions*, **10**, 876.

Albert, A. A. *Rational normal matrices satisfying the incidence equation*, **4**, 554.

—— *A property of ordered rings*, **8**, 128.

—— *Finite noncommutative division algebras*, **9**, 928.

Allen, A. C. *A generalization of a theorem by Hardy and Littlewood*, **3**, 727.

Allen, A. C. and Murdoch, B. H. *A note on preharmonic functions*, **4**, 842.

Ames, D. B. *Certain inversion formulas for the Laplace transform*, **1**, 99.

Amir (Jakimovski), Amnon. *On a converse of Abel's theorem*, **3**, 244.

Amitsur, A. S. See Amitsur, S. A.

Amitsur, S. A. *Nil PI-rings*, **2**, 538.

—— *An embedding of PI-rings*, **3**, 3.

—— *The identities of PI-rings*, **4**, 27.

—— *Algebras over infinite fields*, **7**, 35.

—— *Invariant submodules of simple rings*, **7**, 987.

—— *A generalization of Hilbert's Nullstellensatz*, **8**, 649.

—— *Rings with a pivotal monomial*, **9**, 635.

Amitsur, S. A. and Levitzki, J. *Minimal identities for algebras*, **1**, 449.

—— *Remarks on minimal identities for algebras*, **2**, 320.

Ancochea, Germán. *Zeros of self-inverse polynomials*, **4**, 900.

Anderson, F. W. *A lattice characterization of completely regular* G_δ*-spaces*, **6**, 757.

Anderson, L. W. *One dimensional topological lattices*, **10**, 715.

Anderson, R. D. *Continuous collections of continuous curves in the plane*, **3**, 647.

Anderson, R. D. and Choquet, Gustave. *A plane continuum no two of whose nondegenerate subcontinua are homeomorphic: An application of inverse limits*, **10**, 347.

Anderson, R. D. and Hamstrom, M.-E. *A note on continuous collections of continuous curves filling up a continuous curve in the plane*, **5**, 748.

—— *On spaces filled up by continuous collections of atriodic continuous curves*, **6**, 766.

Anderson, T. W. *The integral of a symmetric unimodal function over a symmetric convex set and some probability inequalities*, **6**, 170.

Andree, R. V. and Petersen, G. M. *Matrix methods of summation, regular for p-adic valuation*, **7**, 250.

Andrews, J. J. *A characterization of light open maps of Euclidean spaces into Euclidean spaces*, **9**, 860.

Ankeny, N. C. *Sums of three squares*, **8**, 316.

Ankeny, N. C. and Chowla, S. *The relation between the class number and the distribution of primes*, **1**, 775.
Apostol, T. M. *Remark on the Hurwitz zeta function*, **2**, 690.
—— *Some series involving the Riemann zeta function*, **5**, 239.
Apostol, T. M. and Zuckerman, H. S. *On magic squares constructed by the uniform step method*, **2**, 557.
Arens, Richard. *The adjoint of a bilinear operation*, **2**, 839.
Arens, Richard and Hoffman, Kenneth. *Algebraic extension of normed algebras*, **7**, 203.
Arens, Richard and Singer, I. M. *Function values as boundary integrals*, **5**, 735.
Arf, C. *On the methods of Rayleigh-Ritz-Weinstein*, **3**, 223.
Arsove, M. G. *The Looman-Menchoff theorem and some subharmonic function analogues*, **6**, 94.
—— *Normal families of subharmonic functions*, **7**, 115.
—— *Proper bases and automorphisms in the space of entire functions*, **8**, 264.
Artzy, Rafael. *On loops with a special property*, **6**, 448.
—— *Self-dual configurations and their Levi graphs*, **7**, 299.
—— *On automorphic-inverse properties in loops*, **10**, 588.
Atkinson, F. V. *On polynomials with least weighted maximum*, **7**, 267.
Aucoin, A. A. *Systems of Diophantine equations*, **2**, 760.
—— *A generalization of Abel's transformation*, **3**, 120.
Aulbach, Helmut. *Some geometrical inequalities for sets in Hilbert space*, **2**, 36.
Auslander, Louis. *On holonomy covering spaces*, **7**, 685.
—— *On the group of affinities of locally affine spaces*, **9**, 471.
—— *A fixed point theorem for nilpotent Lie groups*, **9**, 822.
Auslander, Louis and Auslander, Maurice. *Solvable Lie groups and locally Euclidean Riemann spaces*, **9**, 933.
Auslander, Louis and MacKenzie, R. E. *On the topology of tangent bundles*, **10**, 627
Auslander, Maurice. *On regular group rings*, **8**, 658.
—— *Remark on automorphisms of groups*, **9**, 229.
—— See Auslander, Louis.
Austin, D. G. *An isomorphism theorem for finitely additive measures*, **6**, 205.
—— *Some differentiation properties of Markoff transition probability functions*, **7**, 751.
Azpeitia, A. G. *Convergence of sequences of complex terms defined by iteration*, **9**, 428.

Baer, Reinhold. *Factorization of n-soluble and n-nilpotent groups*, **4**, 15.
—— *Supersoluble groups*, **6**, 16.
Bagemihl, F. and Sprinkle, H D *On a proposition of Sierpiński's which is equivalent to the continuum hypothesis*, **5**, 726.
Bagley, R. W., Connell, E. H. and McKnight, J. D., Jr. *On properties characterizing pseudo-compact spaces*, **9**, 500.
Bahadur, R. R. *Measurable subspaces and subalgebras*, **6**, 565.
Bailey, W. N. *An expression for* $\vartheta_1(nz)/\vartheta_1(z)$, **4**, 569.
Balachandran, V. K. *On complete lattices and a problem of Birkhoff and Frink*, **6**, 548.
Balaguer. See Sunyer i Balaguer, F.
Ball, B. J. *Countable paracompactness in linearly ordered spaces*, **5**, 190.
—— *Certain collections of arcs in* E^3, **10**, 699.
Bang, Thøger. *A solution of the "plank problem,"* **2**, 990.
Barrett, J. H. *Behavior of solutions of second order self-adjoint differential equations*, **6**, 247.
—— *A Prüfer transformation for matrix differential equations*, **8**, 510.
—— *Disconjugacy of second-order linear differential equations with non-negative coefficients*, **10**, 552.
Barrett, L. K. *On a question concerning partitioning raised by R. H. Bing*, **8**, 602.
Barry, J. Y. *On the convergence of ordered sets of projections*, **5**, 313.
Barsotti, Iacopo. *Noncountable normally locally finite division algebras*, **8**, 1101.
Bartle, R. G. *Newton's method in Banach spaces*, **6**, 827.
Bass, Hyman. *Finite monadic algebras*, **9**, 258.

Basu, S. K. *On hypergeometric summability involving infinite limits*, **5**, 226.
Bateman, P. T. and Chowla, S. *Averages of character sums*, **1**, 781.
Bauer, F. L. and Frank, Evelyn. *Note on formal properties of certain continued fractions*, **9**, 340.
Baum, J. D. *An equicontinuity condition for transformation groups*, **4**, 656.
—— *P-recurrence in topological dynamics*, **7**, 1146.
Baum, L. E. *Note on a paper of Civin and Yood*, **9**, 207.
Baxter, Glen. *An analogue of the law of the iterated logarithm*, **6**, 177.
—— *A strong limit theorem for Gaussian processes*, **7**, 522.
—— *Wiener process distributions of the "arcsine law" type*, **7**, 738.
—— *On the measure of Hilbert neighborhoods for processes with stationary, independent increments*, **10**, 690.
Baxter, W. E. *Lie simplicity of a special class of associative rings*, **7**, 855.
Bear, H. S. and Yood, Bertram. *Multiplicative functionals on semigroups of continuous functions*, **10**, 736.
Bearman, J. E. *Rotations in the product of two Wiener spaces*, **3**, 129.
Beaumont, R. A. *Generalized rings*, **9**, 876.
Beck, Anatole, Corson, H. H. and Simon, A. B. *The interior points of the product of two subsets of a locally compact group*, **9**, 648.
Beck, Anatole and Schwartz, J. T. *A vector-valued random ergodic theorem*, **8**, 1049.
Beckenbach, E. F. *On characteristic properties of harmonic functions*, **3**, 765.
Beckman, F. S. and Quarles, D. A., Jr. *On isometries of Euclidean spaces*, **4**, 810.
Beesack, P. R. *A note on an integral inequality*, **8**, 875.
Bell, C. B. *On the structure of algebras and homomorphisms*, **7**, 483.
Bell, J. H. *Families of solutions of the unilateral matrix equation*, **1**, 151.
—— *The solution of a unilateral direct product matrix equation*, **1**, 777.
—— *A note on the solution of the unilateral matrix equation*, **2**, 553.
Bell, P. O. *A theorem on conjugate nets in projective hyperspace*, **3**, 300.
—— *Generalized theorems of Desargues for n-dimensional projective space*, **6**, 675.
Bellman, Richard. *On an iterative procedure for obtaining the Perron root of a positive matrix*, **6**, 719.
—— *Eigenvalues and functional equations*, **8**, 68.
—— *Functional equations in the theory of dynamic programming.* VII. *A partial differential equation for the Fredholm resolvent*, **8**, 435.
—— *On monotone convergence to solutions of* $u'=g(u, t)$, **8**, 1007.
—— *On the representation of the solution of a class of stochastic differential equations*, **9**, 326.
—— *On inequalities for differential operators*, **9**, 589.
—— *On inequalities with alternating signs*, **10**, 807.
Bellman, Richard, Glicksberg, Irving and Gross, Oliver. *Some nonclassical problems in the calculus of variations*, **7**, 87.
Bellman, Richard and Latter, Richard. *On the integral equation* $\lambda f(x)=\int_0^x K(x-y)\cdot f(y)dy$, **3**, 884.
Benner, C. P. *The solution of a diophantine equation*, **3**, 41.
Benson, D. C. *On surfaces with the representation* $z=f(x, y)$, **10**, 980.
Berberian, S. K. *Note on a theorem of Fuglede and Putnam*, **10**, 175.
Berger, Agnes. *On disjoint sets of distribution functions*, **1**, 25.
—— *On orthogonal probability measures*, **4**, 800.
Bergman, Stefan. *A theorem of Green's type for functions of two complex variables*, **4**, 102.
Berman, Gerald. *A three parameter family of partially balanced incomplete block designs with two associate classes*, **6**, 490.
Berman, Gerald and Silverman, R. J. *Simplicity of near-rings of transformations*, **10**, 456.
Bernhard, H. A. *On the infinitude of primitive k-nondeficients*, **7**, 469.
Bers, Lipman. See Agmon, Shmuel.
Bhonsle, B. R. *On a series of Rainville involving Legendre polynomials*, **8**, 10.
Bing, Kurt. *On arithmetical classes not closed under direct union*, **6**, 836.

Bing, R. H. A convex metric with unique segments, **4**, 167.
—— *A connected countable Hausdorff space*, **4**, 474.
—— *Partially continuous decompositions*, **6**, 124.
—— *Each homogeneous nondegenerate chainable continuum is a pseudo-arc*, **10**, 345.
Birkhoff, Garrett and Kotik, Jack. *Note on the heat equation*, **5**, 162.
Birkhoff, Garrett and Mullikin, Thomas. *Regular partial differential equations*, **9**, 18.
Bishop, Errett. *Approximation by a polynomial and its derivatives on certain closed sets*, **9**, 946.
—— *Simultaneous approximation by a polynomial and its derivatives*, **10**, 741.
Blackburn, J. F. See Mann, W. R.
Blackett, D. W. *Simple and semisimple near-rings*, **4**, 772.
—— *The near-ring of affine transformations*, **7**, 517.
—— *Simple near-rings of differentiable transformations*, **7**, 599.
Blackman, Jerome. *Convolutions with rational kernels*, **8**, 100.
Blackwell, David. *The range of certain vector integrals*, **2**, 390.
—— *A representation problem*, **5**, 283.
Blair, Alexander. *Continuity of multiplication in operator algebras*, **6**, 209.
—— See Warner, Seth.
Blair, R. L. *A note on f-regularity in rings*, **6**, 511.
Blankinship, W. A. and Fox, R. H. *Remarks on certain pathological open subsets of 3-space and their fundamental groups*, **1**, 618.
Bledsoe, W. W. *Neighborly functions*, **3**, 114.
Bledsoe, W. W. and Morse, A. P. *Some aspects of covering theory*, **3**, 804.
Bledsoe, W. W., Norris, M. J. and Rose, G. F. *On a differential inequality*, **5**, 934.
Block, H. D. *Linear transformations on or onto a Banach space*, **3**, 126.
—— *Construction of solutions and propagation of errors in nonlinear problems*, **4**, 715.
—— *A class of inequalities*, **8**, 844.
—— *Discrete analogues of certain integral inequalities*, **8**, 852.
—— *Discrete isoperimetric-type inequalities*, **8**, 860.
Block, H. D. and Cargal, Buchanan. *Arbitrary mappings*, **3**, 937.
Block, I. E. *Kernel functions and class L^2*, **4**, 110.
Block, Richard. *On torsion-free abelian groups and Lie algebras*, **9**, 613.
Bloom, Melvin. *On the total variation of solutions of the bounded variation moment problem*, **4**, 118.
Blum, E. K. *The fundamental group of the principal component of a commutative Banach algebra*, **4**, 397.
—— *The Euler-Poisson-Darboux equation in the exceptional cases*, **5**, 511.
Blum, J. R. *Two theorems on almost sure convergence*, **5**, 253.
—— *A note on estimating distribution functions*, **6**, 953.
—— *A note on stochastic approximation*, **9**, 404.
Blumenthal, L. M. and Klee, V. L. *On metric independence and linear independence*, **6**, 732.
Blumenthal, R. M. *Some relationships involving subordination*, **10**, 502.
Boas, R. P., Jr. *Sums representing Fourier transforms*, **3**, 444.
—— *Moments of analytic functions*, **6**, 412.
Boas, R. P., Jr. and Chandrasekharan, K. *Addendum: Derivatives of infinite order*, **2**, 422.
Bochner, S. *On the addition theorem for multiply periodic functions*, **3**, 99.
Bonsall, F. F. *Extreme maximal ideals of a partially ordered vector space*, **7**, 831.
Bonsall, F. F. and Marden, Morris. *Zeros of self-inversive polynomials*, **3**, 471.
—— *Critical points of rational functions with self-inversive polynomial factors*, **5**, 111.
Boyd, A. V. *A Tauberian theorem for a-convergence of Cesàro means*, **7**, 59.
Boyer, D. L. *Enumeration theorems in infinite Abelian groups*, **7**, 565.
Boyer, J. M. and Hall, D. W. *A note on Peano spaces*, **1**, 231.
Braden, C. M. See Koehler, Fulton.
Brafman, Fred. *Generating functions of Jacobi and related polynomials*, **2**, 942.

—— *A set of generating functions for Bessel polynomials*, **4**, 275.
Brahana, T. R. *Products of quasi-complexes*, **7**, 954.
Brainerd, Barron. *On a class of lattice-ordered rings*, **8**, 673.
Bram, Joseph. *Chebychev approximation in locally compact spaces*, **9**, 133.
de Branges, Louis. *The Stone-Weierstrass theorem*, **10**, 822.
—— *The Bernstein problem*, **10**, 825.
—— *Some mean squares of entire functions*, **10**, 833.
—— *Some Hilbert spaces of entire functions*, **10**, 840.
Brauer, George. *Remarks on a paper by Utz*, **9**, 34.
Braunschweiger, C. C. *A geometric construction of the M-space conjugate to an L-space*, **10**, 77.
Bremermann, H. J. *Note on plurisubharmonic and Hartogs functions*, **7**, 771.
Brenner, J. L. *A bound for a determinant with dominant main diagonal*, **5**, 631.
—— *Bounds for determinants. II*, **8**, 532, 1160.
Breusch, Robert. *On the distribution of the roots of a polynomial with integral coefficients*, **2**, 939.
—— *On the extrema of certain polynomials*, **9**, 742.
Breves Filho, J. A. *On the algebraic integrals of a system of differential equations of mechanics*, **1**, 498.
Brewster, J. P. *A modified initial condition for Cauchy's existence theorem*, **4**, 296.
Briggs, W. E. See Chowla, S.
Brigham, N. A. *A general asymptotic formula for partition functions*, **1**, 182.
—— *On a certain weighted partition function*, **1**, 192.
Browder, F. E. *On the iteration of transformations in noncompact minimal dynamical systems*, **9**, 773.
Brown, Arlen. *On a class of operators*, **4**, 723.
Brown, Bailey. *An extension of the Jacobson radical*, **2**, 114.
Brown, Bailey and McCoy, N. H. *The maximal regular ideal of a ring*, **1**, 165.
Brown, Morton. *Weak n-homogeneity implies weak* $(n-1)$*-homogeneity*, **10**, 644.
Bruck, R. H. *On a theorem of R. Moufang*, **2**, 144.
—— *Pseudo-automorphisms and Moufang loops*, **3**, 66.
—— *Analogues of the ring of rational integers*, **6**, 50.
—— *Sums of normal endomorphisms*, **10**, 674.
Bruck, R. H. and Kleinfeld, Erwin. *The structure of alternative division rings*, **2**, 878.
Brunk, H. D. *Note on a theorem of Kakutani*, **1**, 409.
—— *On an inequality for convex functions*, **7**, 817.
Brunk, H. D. and Ewing, G. M. *Line integral approximation of double integrals*, **4**, 287.
Brunk, H. D., Ewing, G. M. and Utz, W. R. *Some Helly theorems for monotone functions*, **7**, 776.
Bryant, S. J. and Zemmer, J. L. *A note on completely primary rings*, **8**, 140.
Büchi, J. R. and Wright, J. B. *Invariants of the anti-automorphisms of a group*, **8**, 1134.
Buck, R. C. *A factoring theorem for homomorphisms*, **2**, 135.
—— *Operator algebras and dual spaces*, **3**, 681.
—— *Essentially admissible sequences*, **4**, 387.
—— *On n-point expansions of entire functions*, **6**, 793.
—— *An addendum to "A note on subsequences,"* **7**, 1074.
—— *Preferred optimal strategies*, **9**, 312.
Burgess, C. E. *Continua which are the sum of a finite number of indecomposable continua*, **4**, 234.
—— *Some theorems on n-homogeneous continua*, **5**, 136, 1001.
—— *Certain types of homogeneous continua*, **6**, 348.
—— *A note on the separation of connected sets by finite sets*, **7**, 1115.
—— *Some conditions under which a homogeneous continuum is a simple closed curve*, **10**, 613.
Burton, L. P. *Conditions which preclude the existence of critical solutions of an ordinary differential system*, **7**, 791.

Burton, L. P. and Whyburn, W. M. *Minimax solutions of ordinary differential systems*, **3**, 794.
Buschman, R. G. *An integral transformation relation*, **9**, 956.
Busemann, Herbert. *Metrizations of projective spaces*, **8**, 387.
Butler, John. *On the normality of an analytic operator*, **8**, 733.
Butzer, P. L. *On the extensions of Bernstein polynomials to the infinite interval*, **5**, 547.
Buzby, B. and Whaples, G. *Quadratic forms over arbitrary fields*, **9**, 335; **10**, 174.

Cairns, S. S. *An elementary proof of the Jordan-Schoenflies theorem*, **2**, 860.
Calabi, Eugenio and Rosenlicht, Maxwell. *Complex analytic manifolds without countable base*, **4**, 335.
Calderón, A. P. *On theorems of M. Riesz and Zygmund*, **1**, 533.
Callahan, F. P., Jr. *An extremal problem for polynomials*, **10**, 754.
Calloway, A. See Grosswald, Emil.
Calloway, J. See Grosswald, Emil.
Calloway, J. M. *On the discriminant of arbitrary algebraic number fields*, **6**, 482.
Cameron, R. H. *The first variation of an indefinite Wiener integral*, **2**, 914.
—— *Differential equations involving a parametric function*, **8**, 834; **9**, 1000.
Cameron, R. H. and Hatfield, C. *On the summability of certain series for unbounded nonlinear functionals*, **4**, 375.
Cameron, R. H., Lindgren, B. W. and Martin, W. T. *Linearization of certain nonlinear functional equations*, **3**, 138.
Campbell, H. E. *An extension of the "principal theorem" of Wedderburn*, **2**, 581.
—— *Concerning Cartan's criterion*, **4**, 515.
Capel, C. E. and Strother, W. L. *A space of subsets having the fixed point property*, **7**, 707.
Cargal, Buchanan. See Block, H. D.
Carleson, Lennart. *On Bernstein's approximation problem*, **2**, 953.
—— *A proof of an inequality of Carleman*, **5**, 932.
Carlitz, Leonard, *A divisibility property of the Bernoulli polynomials*, **3**, 604.
—— *A note on Bernoulli numbers and polynomials of higher order*, **3**, 608.
—— *A note on common index divisors*, **3**, 688.
—— *A theorem of Dickson on irreducible polynomials*, **3**, 693.
—— *Note on a conjecture of André Weil*, **4**, 5.
—— *Congruences connected with three-line latin rectangles*, **4**, 9.
—— *Some sums connected with quadratic residues*, **4**, 12.
—— *A note on Bernoulli and Euler numbers of order* $\pm p$, **4**, 178.
—— *A note on the multiplication formulas for the Bernoulli and Euler polynomials*, **4**, 184.
—— *Remark on a formula for the Bernoulli numbers*, **4**, 400.
—— *A note on partitions in* $GF[q, x]$, **4**, 464.
